**Subject:** ACTION REQUESTED: Destruction of Aquatic and Historic Resources  
**Attachments:** County\_Letter.pdf; Attachments.pdf

Dear Mr. Constantine and Ms. Lambert,

Enclosed please find a letter from the community requesting your help to address the apparently unpermitted destruction of wetlands adjacent to the Evan's Creek Natural Area, tributaries to Evan's Creek (a protected Chinook Salmon habitat) and the historic Red Brick Road (a nationally registered historic landmark).

We request immediate action because work is still ongoing and dates back several years.

In addition to the relief requested in the attached letter, we request that you revoke and remand the recently granted critical areas designation to the relevant agency because extensive, unpermitted discharges and stream work were not considered by the agency.

The letter discusses several concerns and provides evidence to support the concerns (see attached figures).

We look forward to a timely response and working with you to safeguard the natural and historic resources that are being impacted.

Thank you for your help,  
King County Residents
